

SQL Injection

Gizza Farah Nadifa/202301110036

SQL injection berhasil

The screenshot shows a web browser window with the URL `localhost/cybersecurity-main/protected.php`. The page content displays "Selamat datang, user1" and "Ini area terproteksi — hanya setelah login." with a "Logout" link. The browser's developer tools are open to the Network tab, showing a request to `protected.php` with form data: `username=user1` and `password=pass1`. The status bar at the bottom indicates "2/14 requests" and "0.9 kB/75.8 kB tran".

SQL injection gagal

The screenshot shows a web browser window with the URL `localhost/cybersecurity-main/secure_login.php`. The page content displays "Login gagal (secure)." and a "Kembali" link. The browser's developer tools are open to the Network tab, showing a request to `secure_login.php` with form data: `username=user` and `password=' or '1'='1`. The status bar at the bottom indicates "1/13 requests" and "0.4 kB/75.3 kB tran".
